

LUCAS GABRIEL FERREIRA DO NASCIMENTO

Software Engineer | Full Stack & Backend (Pleno)

São José dos Campos, SP, Brazil (Global Remote / B2B) • lucasnascimentocontato@gmail.com
linkedin.com/in/lucas-nascimento-0b773a16a • github.com/luscanascimento

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of software engineering and technical support experience, specializing in full-stack web applications, resilient REST APIs, and database architecture. Proven expertise in Angular, TypeScript, Node.js (NestJS, Fastify), C# (.NET 9), Laravel, PostgreSQL, Clean Architecture, and application security (AES-256-GCM, RFC 6238 TOTP, RBAC). Experienced in distributed locks via Redis, monorepos (Nx, Turborepo), and AI tooling integration via the Model Context Protocol (MCP).

TECHNICAL SKILLS

- Languages & Frameworks:** TypeScript, JavaScript, Node.js (NestJS, Fastify), Angular (Signals, NgRx), C# (.NET 9), Laravel, React, Java, SQL.
- Architecture & Patterns:** Clean Architecture, Domain-Driven Design (DDD), Hexagonal Architecture, CQRS, RESTful APIs, Monorepos (Nx, Turborepo).
- Databases & Caching:** PostgreSQL, Redis (Distributed Locks, Rate Limiting), SQLite (WAL Engine), EF Core 9, Prisma ORM, Eloquent.
- Security & Auth:** Zero-Trust RBAC, BOLA Remediation, AES-256-GCM Vaults, Argon2id, RFC 4226/6238 TOTP MFA, JWT Rotation & Replay Defense.
- Testing & DevOps:** xUnit, FluentAssertions, Vitest, Jest, Playwright (E2E), Testcontainers, Docker, GitLab CI/CD, Git, Linux/Bash, MCP.

PROFESSIONAL EXPERIENCE

FaberSoft Tecnologia — Software Engineer (Full Stack) & Technical Support May 2021 – Present (5+ yrs) | São José dos Campos, Brazil

- Full Stack Development (Angular, Laravel, PostgreSQL):** Architect and develop core web features, maintaining production enterprise applications with modular architecture; manage database migrations and complex SQL query optimizations.
- System Maintenance & Bug Remediation:** Implement frontend components and RESTful endpoints, reducing technical debt, resolving edge-case bugs, and collaborating via GitLab CI/CD version control workflows.
- Technical Support & Hardware Diagnostics:** Delivered L2/L3 technical support for enterprise users, ERP systems, and mobile barcode/data collectors; delivered remote diagnostics via WhatsApp/VoIP to resolve critical operational blockers.

Ruston Alimentos — Logistics & Inventory Operations Assistant Sep 2018 – May 2021 (2 yrs 9 mos) | Jacareí, Brazil

- Managed warehouse stock control, audits, and replenishment using ABC Curve analysis, FIFO (PEPS), and PDCA cycle methodologies to eliminate inventory discrepancies.

FEATURED OPEN-SOURCE PROJECTS

FinanceHub — Multi-Tenant Financial Platform | NestJS 11, Angular 21, Flutter 3, Prisma 6, PostgreSQL, Redis, MCP

github.com/luscanascimento/financial-system

Engineered an Nx Monorepo financial platform with RFC 4226/6238 TOTP MFA and Redis distributed mutex locks to prevent double-entry ledger race conditions; integrated an AI Model Context Protocol (MCP) server; 100% pass rate across 134+ tests.

Task Kanban Flow — Multi-Tenant Kanban System | Fastify, SQLite WAL, Angular 21 Zoneless, AES-256-GCM, Turborepo

github.com/luscanascimento/task-kanban-flow

Architected a Fastify REST backend with BOLA remediation, an AES-256-GCM secrets vault, and an accessible Angular 21 Design System (@tkf/ui) verified by 242 automated Jest/Playwright tests.

OrderFlow API — Enterprise Sales & Order Management REST API | .NET 9, C# 13, EF Core 9, PostgreSQL, xUnit

github.com/luscanascimento/orderflow-api

Designed a pragmatic Clean Architecture .NET 9 Web API with real-time stock validation, automated inventory deduction, and price snapshots; verified by 28 automated xUnit unit and integration tests (100% pass rate).

EDUCATION

Higher Technology Degree in Systems Analysis and Development (Tecnólogo ADS) — UNIP 2026 (Final Semester / Expected Dec 2026)

High School Diploma (Ensino Médio) — EE Hermínia Silva de Mesquita Graduated 2015
